## DESCRIPTION

The Vinyl LP Case is an elegant storage unit that can be adapted to all tastes. Modular, it allows you to easily navigate through your favorite vinyl records in its tray position. In its shelf version, the Vinyl LP Case accommodates your entire collection in a modern, designer case.

Its very resistant metal structure and its bamboo case allow to store up to 80 vinyl records. The Vinyl LP Case can be mounted in both positions on the wall, giving you a wide range of possibilities for your interior. Each module can be stacked on top of the other to build a beautiful vinyl storage tower. Opt for 2 or 3 modules to create a real little vinyl storage unit next to your beloved turntable.
